OUR MISSION

Our objective is to always deliver a beautiful custom built home that surpasses all expectations and requirements. We take great pride in the homes that we build and in the quality-driven reputation that we have earned.

We will ensure that you capture all the local breezes, capitalise upon those magnificent ocean and rainforest views, minimise the environmental impact of your new home and marry inspirational and innovative design solutions with solid construction.

Your new home will be one that matches your lifestyle aspirations with the incredible local natural beauty.

EXCEPTIONAL | INNOVATIVE | UNIQUE

DESIGN AND LOCATION

Australian Tropical Homes is based in Far North Queensland. We are surrounded by abundant natural beauty and are ideally suited to those wishing to create the ultimate luxury home in a beautiful setting.

A key element in the beauty and functionality of your new home will be the overall design that you select. Here at Australian Tropical Homes we can help you create the perfect custom design with our expert in-house architects or we can work directly from plans you provide.

We are highly experienced at building within the confines of any location, from flat grassy plains to mountainous rainforest hills.

We never compromise on location, safety or environmental protection and can help you select the perfect building site from your available land.

YOUR ENVIRONMENT

Australian Tropical Homes is deeply committed to environmental sustainability and protection of the many and varied fragile ecosystems located close to the homes that we build.

Our corporate policy is to support and promote environmentally sustainable practices throughout our business. We always use the latest techniques and materials to ensure climatic control, leading edge design, energy efficiency, storm protection and environmental sensitivity. Our tropical expertise seeks to marry local knowledge and global solutions to tropical home building.
